## **Sensible Medical Innovation announces Successful FDA Inspection**

Sensible Medical Innovations is pleased to announce that it has successfully passed the meticulous inspection conducted by the Food and Drug Administration (FDA). The inspection ended with no observations. This is a significant milestone for Sensible and demonstrates our commitment to delivering high-quality products; and upholding the highest standards of safety and compliance.

The FDA inspection carried out at the Sensible facilities in Netanya, Israel. The inspection encompassed various critical aspects such as manufacturing processes, quality control, record-keeping practices, and overall compliance with FDA regulations.

"We are extremely proud of the successful outcome of the FDA inspection," said Dr. Avi Ludomirski CEO of Sensible Medical Innovations. "This achievement reflects our team's relentless dedication to upholding the highest standards of quality and safety. We are committed to delivering superior products that meet the expectations of our customers and regulatory agencies."

"This is a great accomplishment. It demonstrates Sensible commitment to quality and excellence. The company will continue to develop and provide innovative, high-quality products for better patient management and improved healthcare systems" said Mrs. Peggy Wang, Chair of the board.

### **About Sensible Medical Innovations**

Sensible Medical Innovations sets out to develop a new standard of care in lung fluid management and strives to deliver cutting-edge solutions that positively impact heart failure patients' lives. Sensible developed the ReDS™ medical radar technology that stems from defense "see through wall" applications and holds FDA 510(k) clearance and CE mark as well as many other regulatory approvals for the technology. The company is dedicated to innovation, quality, customer satisfaction and adherence to stringent regulatory standards and is committed to becoming a trusted partner in improving health and well-being.

### **About the ReDS™ Pro System**

The ReDS™ Pro System is an accurate non-invasive device for assessing pulmonary congestion. Assessment with the aid of the point-of-care ReDS™ Pro System has helped physicians and nurses at facilities across the world to better manage their patients' heart failure, with the goal of avoiding readmissions.
